

COVID-19: Scientific Literature

CDHA recognizes the importance of evidence-based decision making to the profession of dental hygiene. Research on COVID-19 and its impact on the delivery of dental hygiene services is emerging, although it continues to be scarce. Most published studies come from China. The following articles, available online at no charge, will support your self-study of COVID-19 and help you mitigate future challenges.

[Transmission routes of 2019-nCov and controls in dental practice](#)

[Possible aerosol transmission of COVID-19 and special precautions in dentistry](#)

[The impact of the COVID-19 epidemic on the utilization of emergency dental services](#)

[High expression of ACE2 receptor of 2019-nCoV on the epithelial cells of oral mucosa](#)

[Coronavirus COVID-19 impacts to dentistry and potential salivary diagnosis](#)

[Coronavirus disease 2019 \(COVID-19\): Emerging and future challenges for dental and oral medicine](#)

[Aerosol and Surface Stability of SARS-CoV-2 as Compared with SARS-CoV-1](#)

[Epidemiological summary of COVID-19 cases in Canada](#)

To keep abreast of the emerging literature, please consult [The New England Journal of Medicine](#), [The Lancet](#), and federal, provincial, and municipal public health authorities regularly.
