Table S1A. Critical appraisal of included studies for Q3 (quantitative studies)

(Y = Yes, N = No, N/A = not applicable)

Authors and date	1. Did the study address a clearly focused issue?	2. Was the method appropriate to research question?	3. Was the sample size appropriate?	4. Was the outcome accurately measured to minimize bias?	5. Were ethical issues considered?	6. Have the authors identified important confounding factors or limitations?	7. Are the results clearly presented?	8. Are the results precise?	9. Are the findings believable?	10. Can the results be applied to another context?
