Supplementary Table S1. Reviewer calibration tool

Inclusion criteria	Exclusion criteria
<10 years	>10 years
English	Non-English
Peer-reviewed or reputable grey literature ^a	Non-reputable sources
Literature pertaining to oral health/health care providers (OHCPs)	Literature pertaining to oral health care provider trainees/students

^aReputable grey literature is defined as non-peer reviewed sources published outside of academia. Sources agreed upon by reviewers as reputable included government and health organization websites, documents, reports, clinical practice guidelines, theses, and conference abstracts.

Did the article meet the criteria listed above? If **yes**, proceed below; if **no**, do not include in review.

Topic Relevance

Are 3 to 4 of the key terms reflected in the article selected?		
Met	Partially met	Unmet
Notes: (i.e., describe any terminology that emerged that was consistent with key terms but a different word was used)		

Does the article pertain to our sample population?		
Met	Partially met	Unmet
Notes: (i.e., OHCPs/HCPs, immigrants, refugees, asylum seekers)		

Is the source a peer-reviewed article (a) or grey literature (b)?

a. Peer-reviewed article

What kind of study was conducted?	
Do the authors note limitations or role of bias?	
What are the stated implications of their findings? (significance)	
Authors:	
Intervention type:	
Study population:	
Aims of the study:	
Methodology:	
Outcome measure:	
Important results:	
Consensus on inclusion (exclusion, inclusion as chosen article, inclusion as supporting article):	

b. Grey literature

Is the source reputable? If **yes**, proceed below; if **no**, do not include in review.

Are there statistics or information that support the research question?	
Notes:	
Include in review?	
Yes	
No	
Include as supporting material?	
Yes	
No
